

NKY GATE ENHANCEMENT PROJECT FACT SHEET

Overview

The proposed NKY Gate Enhancement Project is designed to replace existing natural gas infrastructure originating in the 1950s, in northern Kentucky and southern Ohio. The project aims to enhance system reliability to serve current and future natural gas demand in the region, with completion targeted for Q4 2027. It will require the approval from the Federal Energy Regulatory Commission (FERC) under Sections 7(c) and 7(b) of the Natural Gas Act.

We have started outreach for the proposed project to allow ample time for community and landowner feedback and intend to submit an application to FERC in November 2025 for approval of the replacement project.

Our project will undergo thorough review by FERC and other relevant federal and state agencies. Following our application submission, all landowners and stakeholders will receive further information regarding the FERC process and opportunities for additional engagement.

Project scope

FERC filing	November 2025
Construction activity expected to begin	Q1 2027
Project in-service	Q4 2027

Note: Dates shown are based on our current understanding of the facts and are subject to change.

The Project is located in Mason, Nicholas, Bracken, Pendleton, and Campbell Counties, Kentucky, and Hamilton County, Ohio, and involves various natural gas pipeline replacements, pipeline abandonments, and installation of new natural gas pipelines in addition to the installation of new points of delivery and modifications to existing points of delivery. The Project is designed to enhance the safety, integrity, and reliability of the Columbia's existing natural gas transmission system.

Components of the project include:

- Installation of approximately 25 miles of new 36-inch steel coated pipeline to replace 43 miles of existing pipelines in Campbell, Pendleton and Bracken Counties in Kentucky and Hamilton County, Ohio.
- Replace approximately 5 miles of existing 14-inch pipeline with new to connect segments in Nicholas County, Kentucky
- Installation of several short connectors in Pendleton and Campbell counties, Kentucky and Hamilton County, Ohio.
- Installation and modification of various new and existing aboveground facilities along the Project route, in Bracken, Pendleton, Campbell, and Nicholas Counties, Kentucky and Hamilton County, Ohio.

At TC Energy, our priority is to be a good neighbor. We recognize the importance of relationships with stakeholders and are committed to engaging them early in the project development process to understand their concerns and what matters to them throughout the duration of the project.

Company information

We are a leader in North American energy infrastructure, spanning Canada, the U.S. and Mexico. Every day, our dedicated team proudly connects the world to the energy it needs, moving over 30 percent of the cleaner-burning natural gas used across the continent. Complemented by strategic ownership and low-risk investments in power generation, our infrastructure fuels industries and generates affordable, reliable and sustainable power across North America, while enabling LNG exports to global markets.

Our business is based on the connections we make. By partnering with communities, businesses and leaders across our extensive energy network, we unlock opportunity today and for generations to come.

TC Energy's common shares trade on the Toronto (TSX) and New York (NYSE) stock exchanges under the symbol TRP. To learn more, visit us at [TCEnergy.com](https://www.tcenenergy.com).
